

William Wesley Stevens

Seattle, WA & San Bruno, CA • wesley@wesleystevens.com • 650-922-4883 • www.linkedin.com/in/wws-uw/ • wesleystevens.com

EDUCATION

University of Washington, College of Engineering

Bachelor of Science in Electrical & Computer Engineering

Dean's List, DTC (Direct-to-college) admission to College of Engineering

Seattle, WA

Expected June 2028

EXPERIENCE

UW Information Processing Lab

Undergraduate Researcher

Seattle, WA

January 2026 - Present

- Primarily assisting in the AI and Machine Learning-based Multi Object Tracking for Underwater Vision Project, using GitHub repos Grounding DINO and SAM2 to track marine animals across a collection of videos.
- Assisting graduate students with the Video LINC program hosted by the Office of the Director of National Intelligence, a human detection, tracking & re-identification challenge across diverse video sensor collections.
- Work consisting of running videos through the repos (in python) and visually analyzing them and providing insight to graduate students on how to make our tracking models more efficient.

Engineers Without Borders: Local Projects

Electric Mobility Device Charging Station

Seattle, WA

September 2024 - Present

- Committing 4 hours / week to improving knowledge of circuitry, interpreting KICAD Schematics, and building a prototype charger for electric mobility devices.
- Constructed new PCB's via soldering through-hole and surface-mount devices.

Student Manager

UW Softball

Seattle, WA

September 2026 - Present

Restaurant Host

The Cheesecake Factory @ Bellevue Square

Bellevue, WA

June 2026 - September 2026

Youth Baseball Coach

Part-Time Youth Baseball Coach for UW Baseball Youth Summer Camp

Seattle, WA

July 2026 - August 2026

PERSONAL PROJECTS

Personal Portfolio Website

September 2026 - Present

- Designed and developed a full-stack personal portfolio site using React, Next.js, and TypeScript.
- Deployed via GitHub and Vercel with automatic build and deployment on every commit.
- Integrated a git-based headless CMS to decouple content from page components to enable structured content updates without direct code changes.
- Debugged inconsistent formatting across screen sizes and browsers, adjusting the layout until every page rendered correctly on mobile and desktop.

ADDITIONAL INFORMATION

Interests: AI & Machine Learning, Sustainable Energy, Embedded Systems, Control Systems

Relevant Coursework: Computer Architecture, Circuit Theory, Signals & Systems & Data, Digital Circuits & Systems, Intermediate Java, Python for Signal Processing, Calculus, Linear Algebra, Differential Equations

Software Skills: Java, Verilog, Python, MATLAB, Linux, KiCad, ModelSim, Fusion 360, Excel, Word

Hardware Skills: Raspberry Pi, PCB Design
